

# Hi-Wett® Super-spreader, Hi-Wett® Xtra Super-spreader/sticker

## Suggested dose rate table – Grass for Seed

Approx. rate of **Hi-Wett** in fl. ozs / acre with multi-mixtures

Crop	Total pints and pounds of product in mix per acre								
	1	2	3	4	5	6	7	8	9
Grass	3.2	3.2	4	4.8	6	7.2	8	8.8	9.6

- NOTES:**
1. Include all formulated foliar nutrients (e.g. Bortrac), but do NOT include fertiliser salts (e.g. urea, Nutrileaf, etc.)
  2. When using Score, Shirlan or Tamaron alone or in tank mixes, add additional ¾ fl.oz. / acre of **Hi-Wett**
  3. When using Li-700 penetrant add additional ¾ fl.oz. / acre of **Hi-Wett**
  4. When using Super Sprout Stop + Li-700 deduct 1 ½ fl. oz. / acre of **Hi-Wett**
  5. When using Presto or Success on onions with 2-3 lbs/acre of Manzate, deduct ¾ fl.oz. / acre of **Hi-Wett**
  6. Substitute **Hi-Wett Xtra** for **Hi-Wett** when rainfast properties are required. Use double the chart rates for **Hi-Wett Xtra**.
  7. Do not use **Hi-Wett** or **Hi-Wett Xtra** on these crops in water rates above 50 gals/ acre as run-off may occur
